

NeuralMind AI Solutions Pvt Ltd

CODING STANDARDS

Document ID: ENG-CS-001

Version: 1.0

Effective Date: January 2026

Purpose

This document defines the coding standards and best practices followed by NeuralMind AI Solutions Pvt Ltd to ensure code quality, maintainability, and consistency across all software projects.

Naming Conventions

- Variables must use snake_case.
- Class names must use PascalCase.
- Constants must use UPPER_CASE.
- Function names must use snake_case.

Documentation Standards

All functions and classes must include descriptive docstrings explaining their purpose, parameters, and return values.

Error Handling

- Use meaningful exception messages.
- Handle exceptions using try-except blocks.
- Avoid suppressing exceptions without logging.

Code Reviews

All code changes must be reviewed before merging into the main branch.

Each pull request requires approval from at least one reviewer.

Testing Requirements

- Minimum 80% test coverage.
- Unit tests required for new features.
- Critical business logic must be tested.

Table

Standard	Requirement
Test Coverage	80%
Reviewer Approval	Required
Docstrings	Mandatory
Naming Convention	snake_case
