MODEL DEPLOYMENT GUIDE

Document ID: AIML-DEP-001

Version: 1.0

Effective Date: January 2026

Purpose

This document explains the deployment process for machine learning models.

Deployment Steps

1. Train model
2. Validate performance
3. Save model artifact
4. Create API endpoint
5. Containerize using Docker
6. Deploy to cloud

Supported Platforms

- AWS
- Azure
- Google Cloud Platform

Monitoring Metrics

- Response latency
- Prediction accuracy
- Data drift
- System uptime

Table

Platform	Supported
AWS	Yes
Azure	Yes
GCP	Yes
