GIT WORKFLOW GUIDE

Document ID: ENG-GIT-001

Version: 1.0

Effective Date: January 2026

Purpose

This guide defines the Git workflow used for software development projects.

Branch Structure

main

develop

feature/*

hotfix/*

Workflow Process

1. Create a feature branch from develop.
2. Implement the feature.
3. Commit changes with meaningful messages.
4. Push branch to repository.
5. Create pull request.
6. Obtain code review approval.
7. Merge into develop branch.

Commit Message Format

feat: Add login functionality

fix: Resolve API timeout issue

docs: Update README

Pull Request Guidelines

- Include a clear description.
- Link related tasks.
- Ensure tests pass.

Table

Branch	Purpose
Main	Production
Develop	Integration
Feature	New features
Hotfix	Emergency Fixes
